QA ASSESSMENT

Deadline :: 2 days

Automation Assessment Task:

Objective: 1. Test the sign up flow

2. Login with same account

3. Signout and

4. Change Password

Task: Automate creating an account on the website

<https://magento.softwaretestingboard.com/> and signing in with that account.

Deliverables:

Write Test Cases: Document your test cases in an Excel file.

Automation Code: Provide a link to your GitHub repository where you have committed the automation code using any available framework (Selenium, or Cypress) for your test cases. Make sure to commit your repo multiple times.

Ensure to use POM(Page Object Model) for test scripts.

Please attach a proof of execution of your code in terms of either screenshot or screen-recording.

Additional Tips:

Clarity: Ensure the code is clear and understandable.

Error Handling: Ensure that the code is error-free and robust.

Structuring: Ensure that the repository is well-structured and formatted. Please do not submit single-file code; submit the entire repository.
